We have CLEAN and SAFE water!!!

In October 2017, Governor Jerry Brown signed into law California Assembly Bill 746 which requires community water systems to conduct lead sampling of drinking water in all public and private CA K-12 schools constructed before 2010. According to the U.S. Environmental Protection Agency, there are no safe levels of lead, and long-term exposure to lead causes a number of health problems. California rarely has any occurrences of naturally occurring lead in drinking water sources, but it may become present when water passes through older plumbing fixtures or solder containing lead that connects plumbing.

Oroville Christian School is supplied water for consumption by South Feather Water and Power Agency (SFWPA), and therefore they are responsible for the costs associated with collecting drinking water samples, analyzing them and reporting results through this new program. By law, they are required to complete lead sampling in all of the schools they serve by 2019, and they conducted the sampling on our campus on October 24, 2018. Administrative staff received great news with the sampling results while we were off school due to the fire. The laboratory analyzing the samples returned results with "non-detectable levels" from all of the sampling locations. As they are required to, SFWPA has reported this information to the State Water Board through the Division of Drinking Water. South Feather Water and

Power is committed to the health of the school children and community that it serves. We are grateful for their help to ensure that our students are drinking CLEAN and SAFE water!
